Professional Summary

AI Automation Engineer and Multi-Agent Systems Architect with hands-on expertise building real-world LLM-powered solutions. Skilled in orchestrating large language models (LLMs), designing retrieval-augmented generation (RAG) systems, and automating business workflows using both code and no-code platforms. Proven experience developing agentic tools for trading, customer support, project planning, and smart contract systems. Passionate about applying AI to solve operational bottlenecks and drive scalable impact.

Core Skills

AI/LLM Tools & Frameworks: CrewAI, LangChain, OpenAI API, Anthropic, FAISS, Vector DBs, RAG Architecture

Automation & No-Code Platforms: Make.com, Zapier, UiPath, n8n, Airtable, Google Apps Script

Other Tools & Platforms: Cursor, Replit, Claude, Bolt, Notion, GitHub Copilot, Vercel, Hugging Face

Programming & Dev Tools: Python, JavaScript, TypeScript, MongoDB, Node.js, Git, REST APIs

Other: Docker, HTML/CSS, Jira, Firebase, Vercel, Webhooks

Certifications

- IBM AI Developer Certification
- IBM AI Engineer Professional Certification
- Machine Learning Specialization – Coursera
- Machine Learning Engineer Certificate – Kaggle
- API Design Certification – Postman
- Make.com Certified Expert – Make.com
- Zapier Automation Mastery – Zapier
- Advanced Multi-Agent Systems with CrewAI – DeepLearning.AI
- Generative AI for Software Development – Coursera
- Prompt Engineering & GenAI Applications – DeepLearning.AI

Professional Experience

Upwork (Remote)

AI Automation Engineer | Multi-Agent Systems Architect | Workflow Automation Expert

Jan 2023 – Present

AI-Powered Lead Qualification Platform – Built an end-to-end lead qualification system using FastAPI, CrewAI, and OpenAI. Implemented a scoring engine analyzing 10+ intent signals with automated routing via Make.com and a real-time dashboard using Chart.js.

RAG Chatbot System – Developed a customer support chatbot using RAG architecture with ChatGPT API and FAISS. Enabled intelligent semantic search across documents, providing precise, auto-updating responses for internal knowledge systems.

- Engineered end-to-end business automation workflows using Make.com, Zapier, n8n, and UiPath across sales, onboarding, and content generation.

- Architected reusable LLM pipelines using LangChain, integrated with REST APIs and cloud-based automation tools.

Algorithmics Global (Remote)

Sales Manager & Automation Lead

May 2022 – Jun 2024

- Deployed an AI-powered chatbot to automate parent–student communication, reducing response time by 50%.
- Designed enrollment outreach automation flows that led to 30% increase in student registration in the first quarter.
- Trained and led a remote sales team and established strategic partnerships with schools and organizations.

Logistics Europe Africa, Lille, France

Operations Manager

Nov 2014 – Mar 2020

Managed logistics and vendor operations across France and Africa, gaining experience in high-pressure coordination, risk mitigation, and supply chain automation opportunities.

Bomaka Credit Union, Buea, Cameroon

Account Manager

Nov 2010 – Mar 2014

Built and executed outreach strategies for local businesses, increasing adoption of low-cost financial services through field engagement.

Selected Projects

AI-Powered B2B Company Enrichment Tool – Developed a full automation pipeline combining Python, web scraping, API enrichment, and OpenAI-based summaries. Delivered business intelligence and customer profiles through a modular, error-tolerant architecture.

Memai – Multi-agent crypto signal bot using LLMs, real-time data filtering, wallet tracking, and trading logic execution. Integrated signal distribution to Twitter and Telegram via APIs.

BizAutomate – Inbox assistant using AI for email categorization, dashboard visualization, and task automation.

Additional Experience / Simulations

Datacom Automation Job Simulation – Forage (April 2025)

Completed a simulation focused on automating a staffing firm's timesheet-to-invoice process as an Automation Developer.

- Mapped and designed a flow chart of the automation process for key personas across the organization.
- Identified automation opportunities across timesheet, approval, and billing processes.

BCG GenAI Job Simulation – Forage (February 2025)

Completed a simulation for BCG's GenAI Consulting team.

- Built a financial AI chatbot using Python and Pandas.
- Parsed and interpreted financial data from 10-K and 10-Q reports to deliver insights via chatbot logic.

Education

University of Buea, Cameroon

Bachelor's Degree in Business and Management
